Ladies and Gentlemen, Dear Readers,

We present to you a unique photo album “Visegrad in pictures” which is a result of cooperation between the self-governments of the Lodzkie Region (Poland), Csongrád County (Hungary), Žilina Self-Governing Region (Slovakia) and The Town of Třebíč (Czech Republic).

The countries of the Visegrad Group share common history as well as the present. Now, looking at this digital photo album, you will also discover for yourselves exceptional cultural, natural and tourist attractions of this region.

Hopefully, thanks to our publication, those – perhaps still not very well-known – corners of Central Europe will become popular holiday destinations.

Come and visit!
The Žilina Region is situated in the north-western part of Slovakia and borders with Poland and the Czech Republic. The surface of the region is mostly mountainous, with relatively high average altitude.

Nature and culture are the main treasures of the Žilina Region. More than a half of the region is occupied by natural areas of different protection level. Four territories in the region were declared national parks - High and Low Tatras, Veľká Fatra and Malá Fatra. There are also four protected landscape areas, 62 national nature reserves, 39 natural monuments and 9 protected natural monuments.

The region also boasts 22 national cultural monuments, 1 town protected area, 3 protected areas of folk architecture and 3 sites which were registered in the UNESCO World Cultural Heritage List.

The surface predetermines the region to be an attractive destination for all visitors who look for active relax. 25% of all marked hiking trails and cycling routes of Slovakia are situated in the Žilina region. In winter, a rich variety of sport possibilities is enriched by a lot of ski resorts, which offer cross country skiing trails and ski tracks of high quality, but also the most modern ski lifts and cable cars within Slovakia (Jasná Chopok in the Nízke Tatry Mountains, Zuberec-Janovky in the Western Tatras etc). The territory is blessed with thermal and mineral waters, there are spas with several hundred years of history e.g. Rajecké Teplice, Turčianske Teplice, Lúčky. Tourists can also visit the largest Aqua Park in Central Europe or enjoy water sports at dams and lakes.

Visitors keen on history can learn more about folk architecture, traditions and customs in several open-air-museums or folk festivals, which are annually held in Východná, Terchová, Zuberec etc.

Excellent natural conditions, services of high quality, plenty of ski resorts, water parks, spas and cultural peculiarities annually attract almost 1 million tourists what is more than the population of the region.
Dear tourists, visitors and friends,

I consider the region of Visegrad Group to be a very specific one within Europe. In a relatively small area there are nations who experienced a common history and lived side by side for centuries. However what I have always found fascinating is that despite the geographical and historical proximity our countries are so unique. Therefore I welcome the idea to compose the digital album that can present the rich variety of monuments, cultural peculiarities and natural attractions that differ from country to country. Now when I am turning the pages I realize this is also another way how to get to know each other and make new partnerships. Moreover, this album is an inspiring invitation for all lovers of travelling.

I am very pleased that Žilina Region can contribute to this activity with its unique collection of beauties. I believe you will find them motivating enough to visit us. We look forward to seeing you in our region!

Juraj Blanár

President of the Žilina Self-Governing Region
Orava Castle towers on a steep 112 meters high limestone cliff above the village Oravský Podzámok. The first written record of the castle goes back to 1267; next centuries brought a lot of noble owners. The National Cultural Monument is the most visited Slovak castle and a lot of films and fairy tales were shot there, including the first black and white horror film “Nosferatu the Vampire” in 1921.

Orava Village Museum in Zuberec
The museum is located in Zuberec at the foothills of the Western Tatras and was established in 1967 as the first museum of its kind in Slovakia. Approximately 50 buildings of folk architecture depict a typical village of the area with a main street, a church, goral hamlets or a mill. The jewel of the place is the wooden Church of St. Elisabeth of Hungary from the beginning of 15th century.

The Western Tatras are the highest mountains in the Žilina Region with an altitude of over 2000 m asl. The mountains compose the western most part of the High Tatras National Park that was established in 1948 as the first one in Slovakia. The place is a paradise for winter and summer tourism. In addition to hiking trails and a ski resort, tourists can visit the Brestovská Cave on an adventure tour.

GPS Position: N49°13'56" E19°42'51"
Wooden Church in Leštiny – UNESCO Site

The wooden Church of Lutheran Church in Leštiny belongs to the articular architecture. In accordance with strict rules, it was built in one year (1688-89) without a single iron nail and is the oldest church of its kind in Slovakia. The exterior in the Renaissance style and its Baroque decorations are completely preserved. In 2008 the church was registered in the UNESCO World Heritage Site List.

GPS Position: N49°11'23'' E19°20'54''

Wooden Church in Tvrdošín – UNESCO Site

The oldest preserved monument in Tvrdošín town is the Gothic wooden Roman Catholic Church of All Saints, which was built in the second half of the 15th century. In 2008, the church was registered with another 7 wooden churches of the Carpathian Arch in the UNESCO World Heritage List. The professional reconstruction and restoration of the church was awarded the EUROPA NOSTRA plaque in 1993.

Kysuce Village Museum in Vychylovka – historical logging back swath railway

34 buildings of the ethnographic exposition in the open-air museum present the way of life and settlement that was characteristic for Kysuce. The site is unique for its location in the quiet environment of the forests. The part of the open-air museum is the Historic Logging Back Swath Railway opened in 1926, which is currently the only railway of its kind in Europe and one of three in the world.

**Spherical stones in Megoňky**

Megoňky on the border with the Czech Republic boasts a geological rarity of world importance - spherical stones that were declared a national natural reserve in 2003. The locality is the largest of its kind in Europe and is distinguished by a number and perfect shape of the stones. The formation of the stones has not yet been explained and the mystery attracts geologists from all over the world.

Gothic Church of All Saints in Ludrová

The Church of All Saints in Ludrová was built in the last third of the 13th century and it is one of the oldest early Gothic monuments in Slovakia. The interior hides uniquely preserved Gothic frescoes dating back to the years 1400 - 1440. The magical atmosphere of the ancient church served as a backdrop for several Slovak films, such as “A thousand-year-old Bee” or a “Legend of Flying Cyprian”.

View Tower in Petránky – Beskydsko-javornicka cross-country skiing and cycling trail

One of the most famous routes for cross-country skiers and mountain bikers is led on the ridge of the Javornik Mountains and is 50 km long. There are several attractions on the route e.g. four view towers built of natural materials such as wood and stone. The overall atmosphere is complemented by artistic objects and sculptures created by regional artists - a gallery in the natural countryside.

Wedding Palace in Bytča

One of the most important Renaissance monuments in Central Europe was built by Italian masters in 1601 in Bytča on the order of Palatine Juraj Turzo, the second most important man in Hungary, and served for wedding ceremonies of his seven daughters. The palace is distinguished by a monumental hall, which has no similarity in Slovakia and a rich sgraffito ornament around the windows and portal.

Painted Houses in Čičmany

The distinctive village of Čičmany is famous for the folk architecture decorated with a characteristic white ornament. The geometric decoration is about 200 years old. The reserve was declared in 1977 and includes 136 buildings, but many of them are still inhabited. The unique pattern became a symbol of Slovakia and represented it at the Olympics in London and Sochi and at the World Expo in Milan.

Vlkolínec – UNESCO Site

The site of folk architecture mainly from the 18th century is situated in the Veľká Fatra National Park. The first written record of the place dates back to 1376. It is the only municipality in Slovakia that remained untouched by modern construction. Vlkolínec was classified as the best preserved settlement of this type in the Carpathian Arch and in 1993 listed in the UNESCO World Heritage List.

GPS Location: N49°2’20” E19°16’41”
Lietava Castle
The romantic Lietava Castle is located above the village of Lietava at 635 m asl. The castle belongs to the largest and best preserved ruins in Slovakia and is freely accessible. The oldest parts were built in the last quarter of the 13th century and its construction was completed in the Renaissance period. The curiosity is that the castle was never conquered by alien troops during its existence.

Mt. Veľký Rozsutec
Veľký Rozsutec in Malá Fatra National Park was declared a National Nature Reserve in 1967. The peak and the surrounding area are home to many endangered species of plants and animals, four of which cannot be found anywhere else in the world. Although to climb Veľký Rozsutec is very demanding, the hiking trail is very popular with tourists for stunning panorama views from the top of the mountain.
GPS Location: N49°13′52″ E19°06′00″
**Via Ferrata Route to Martinské hole**
The hiking trails to Martinské hole are considered the oldest in Slovakia. They also include a Via Ferrata Trail of Mountain Rescue Service, which is located in a narrow canyon formed by the Pivovarský stream. The trail leads along steep rocks, waterfalls up to 30m high and real wilderness and is secured by steppers, ladders and steel ropes, which makes it a delicacy for keen hikers and climbers.

The town of Třebíč, Czech Republic

The town of Třebíč is located almost in the heart of the Czech Republic. It is situated in the southwestern part of the Bohemian-Moravian Highlands on both banks of the river Jihlava. It is the 2nd largest town in the Vysočina Region with almost 37,000 inhabitants.

The beginnings of Třebíč date back to 1101, when Benedictine monastery was founded here. It belonged to the richest in its time and became an important center of religious life and education. Soon after its foundation, Třebíč was called the town, as is confirmed by the text of the historical document from 1277.

An important historical milestone was the year 1468, when the town was almost destroyed during the wars between Jiří of Poděbrady and Matyáš Korvín. The Gothic image of Třebíč as well as the Renaissance image did not survive. After numerous fires, Renaissance and Baroque shields of houses in the city centre were replaced by facades from the late 19th and early 20th centuries. Therefore, valuable for us today are three preserved Renaissance houses on Charles Square.

The tremendous change to the town brought 19th century. The dominant textile crafts were replaced by the production of footwear and leather processing and the related construction of industrial buildings.

Since 2003, when three most important town’s monuments basilica of St. Procopius, the Jewish Quarter and the Jewish cemetery were listed on the List of World Cultural and Natural Heritage UNESCO, the town of Třebíč is primarily known thanks to them.

But Třebíč are not only UNESCO monuments. There are many other attractions here that are worth seeing. For example the town Tower, the main town’s dominant, the Alternator Science Center, the Laguna Aquapark, the Vysočina Museum, the Exposition of Franta or the Memorial Hall of Antonín Kalina, rescuer of Jewish boys from Holocaust. And these are just some of the highlands of the town’s attractions. Combined with the beautiful nature interwoven with many hiking trails, Třebíč is a place worth visiting!
Dear friends,

Let me invite you to visit the town of Třebíč, which you will find almost in the very heart of Europe, in the Czech Republic, one of the Visegrad Four countries. Extraordinary historical monuments, beautiful corners and breathtaking views of the city, where the past blends with the present, are waiting for you on both banks of the river Jihlava.

Třebíč is famous for its UNESCO monuments – the Basilica of St. Procopius, the Jewish Quarter and the Jewish Cemetery. But there is more worth seeing. Sports fans, art lovers or families with children will also have a great time here. And do not forget the beautiful nature in the surroundings of Třebíč! It is always calling you cycling or just for a pleasant walks.

In selected photos, we are bringing you just a little tasting of the historical and natural treasures hidden in our town. I believe it will take your interest enough to visit Třebíč soon.

Let this photo album inspire you for your next trip to discover our town of Třebíč and other beautiful places in regions of Visegrad Four!

Please accept our cordial invitation to visit Třebíč!

Pavel Janata,
Mayor of Town of Třebíč
Town of Třebíč

Town of Třebíč is located in the Vysočina Region. It is its 2nd largest city. It is situated in the southwestern part of the Bohemian-Moravian Highlands on both banks of the river Jihlava. Almost 37,000 residents live here. It is a town with a rich history. The beginnings of the city go back to 1101, when the Benedictine monastery was established here. Since 1277 Třebíč has been designated a town.

Town of Třebíč, Charles Square
Charles Square in Třebíč is one of the largest squares in the Czech Republic due to its area of 2.2 hectares. It originated at the turn of the 60’s and 70’s of the 13th century as an extensive marketplace. The square is lined with houses with historic facades on both sides. The sculpture of St. Cyril and Methodius, which was solemnly revealed in 1885, stands in the middle.

Website: www.visittrebic.eu/patrician-houses/the-frantiskovsky-painted-house/
Town of Třebíč, UNESCO Monuments

The most precious monuments of Třebíč were registered on 3rd July 2003 on the UNESCO World Cultural and Natural Heritage List. The Jewish Quarter, along with the Jewish Cemetery and the Romanesque-Gothic Basilica of St. Procopius, became the 12th UNESCO site in the Czech Republic. One of the reasons for enlisting was the close long-standing coexistence of the Jewish and Christian community.

Třebíč Region, Natural Park Třebíčsko

Třebíčsko Natural Park is situated north of Třebíč on 9,800 hectares. There are only small areas of the original forests left with mixed spruce, pine, oak, some maple and beech trees. Among them you can also find memorable trees of remarkable age. The most famous of them is about 700 years old great maple at Věstoňovice. Protected flowers as purple sowbread and pasque flower also grow in the park.

GPS: 49.1091917N, 16.1838056E

Třebíč Region, Pond Příbyl near Village Smrk

Třebíčsko is situated in the picturesque landscape of the Bohemian-Moravian Highlands and ranks among the cleanest areas in the Czech Republic. Nature is well preserved here, almost untouched by human activity. A slightly wavy landscape with mixed forests, numerous ponds, romantic river valleys, and many well-marked hiking trails create ideal conditions for recreation in nature.

GPS: 49.2292061N, 16.0231197E

Třebíč Region, Mohelenská Serpentinite Steppe National Nature Reservation

Some of the numerous protected areas nearby Třebíč can be visited and explored though numerous hiking and thematic nature trails. Among the most attractive natural locations in region belong the Mohelenská Serpentinite Steppe National Nature Reserve - unique location in Europe with special flora and fauna – and the deep canyon valleys of the Oslava and Chvojnice rivers with many romantic corners.

The Hrádek Municipal Park is located on a hill over the left bank of the Jihlava River. Conversion of the area about 7.5 hectares into a forest park in 1926 preceded the construction of Masaryk’s Viewpoint in 1930. Now there is a popular cruise and relaxation place with beautiful views of Třebíč, its historical centre and almost all main dominants of the town.
The Hrádek Municipal Park GPS: 49.2182972N, 15.8826606E
Masaryk’s Viewpoint GPS: 49.2167972N, 15.8845797E

Masaryk’s Viewpoint GPS: 49.2167972N, 15.8845797E

A water reservoir above the town near place called “Kosteliček” on the Strážná Hill stands since 1940. This building used to serve to supply the town with drinking water until the 70’s. At present, the visit will allow not only an attractive view of the town and all its monuments, but also a brief insight into the history and present of the Třebíč waterworks in the form of audio-visual projection.
Lookout Tower Kosteliček GPS: 49.2094967N, 15.8735661E
Csongrád County is situated in Southern Hungary, on the sides of River Tisza, at the border of Serbia and Romania. This is the meeting point of East and West, North and South, as well as different cultures. This region can offer colourful and varied touristic attractions. Its historical events of national importance, ancient monuments, unique ethnographical characteristics, gastronomical traditions and high-quality events with favourable natural and economical character represent a considerable attraction.

The region has 2200 sunny hours a year which makes it ideal for tourism. The soil is rich in thermal water, and thanks to the developments of the recent years the spas are open all year with its indoor services. Travellers can find accommodations that meet every need from the simple guest houses to the four star wellness hotels.

The range of tourist services expanded rapidly in the past years to provide activities to all ages. Adventure parks, bike rental spots, sightseeing by Segway are only a few examples which tourists can enjoy during their visit. Equestrian sports also have high reputation in the county and the National Horse Theatre can be found in the city of Mórahalom. The youngest zoo of Hungary is welcoming visitors in Szeged on almost 45 hectares which makes it the biggest zoo in the country.

Those, who prefer traditional tourism can also find the ideal places in Csongrád County. The region is rich in fine arts and historical values. Unique ceramics, embroidery and laces are admirable. Several exhibitions can be visited to enlighten archaeological pieces, traditional handcrafts and also masterpieces of paintings and arts.

Csongrád County is proud of its gastronomy: Tisza fish soup, ground paprika of Szeged, red onions from Makó, products made of goose liver, sweet peppers from Szentes, strudel from Mórahalom, cottage cheese pie from Hódmezővásárhely, Serbian originate Brza gibanica, wheat germ pudding are parts of the Csongrád County Collection of Values.
Dear Reader!

Thank you for your interest in the regions of the Visegrád Four Regions and in this publication which aims to highlight the cultural and natural beauties of the area.

Please allow me to recommend the V4 regions and Csongrád County in a few words. The need to know each other’s countries is growing, especially because of the serious security situation affecting the world. The V4 countries form a safe island where the foreign travellers can relax, regardless of their age or interest. Despite the geographical proximity we have rarely visited the surrounding countries, although the cultural and natural treasures offered by the area are unique.

Let me invite you now to an imaginary trip to Csongrád County to prove that the travellers can easily spend a week or more here. The River Tisza and its surroundings offer a wonderful opportunity to discover the untouched nature on foot or by boat. The region has well-developed bicycle road network and paddling and kayaking opportunities for those who prefer active recreation. We are rich in thermal springs, so you can choose from several spas and aquaparks. If you prefer to go fishing, you can also find many beautiful lakes. For those who are interested in history and in built heritage, Csongrád County is a perfect choice: rural, civic and aristocratic culture left its marks everywhere. You can easily see farmhouses, mills, manors or beautiful streets leading between 19th century buildings and museums. When you get hungry at the end of the day, you can choose from various local and Hungarian gastronomic specialties: for example, Szeged-styled fish soup, or the well-known Goulash. Besides the traditional cuisine you can also taste the creations of modern restaurants and superb pastry shops. You can find festivals every weekend from Spring to Autumn where you can spend the night and taste local wines.

I hope that this publication arouses your interest, and that later on, we can welcome you in Csongrád County!

Yours sincerely,

Béla Kakas
President of Csongrád County
The Móra Ferenc Museum is located in the heart of Szeged, on the riverbank. Its patinous building is dominant part of the city. The institution is an outstanding cultural center of the region. Permanent and continuously renewed periodical exhibitions are organised here.

The iconic symbol of Szeged is the votive church. The church has been renewed recently: the liturgical space was reconstructed and in the crypt, a multifunctional exhibition space has been set up with an art shop and a bookshop. The 81 meters high western tower and the Demetrius Tower has been opened to the public.
Photo: Balázs Papdi
The Water Tower of Szeged was built in 1904 and was renovated together with the Saint Stephen Square around it in 2006. The Tower is open to the public.

Farmhouses are traditional rural settlement formations in the Great Plain. These play an important role in the Hungarian social and historical heritage. The houses out of the villages, surrounded by the fields give a special close-to-nature feeling for the inhabitants and the visitors as well.

Photo: Balázs Papdi

Csongrád County’s economy is based on agriculture. From Spring until Autumn, the colour palette of the growing crops offers a wonderful view.

GPS: x-46.2747 y-20.0625,

The waterside offers many recreational and sporting activities. There are many tourist services in these areas.

Photo: Balázs Papdi

The lake system is open all year long for fishing enthusiasts, while those wishing to take a bath can enjoy the beauty of the landscape and the cooling water from 15 May to 30 September. Around the small lake we can also find an outdoor fitness park, playground, soccer and volleyball court and a wakeboard track.

Photo: Sándor Vadász
Rose bushes are grown in Szőreg, the warmest and brightest region of the country since the 19th century. 98% of Hungarian rose bushes are grown here. Szőreg rose stocks are registered among the Protected Designations of Origin and Geographical Indications. Every year the Rose Festival is organised in Szőreg.

The Lodzkie Region

The Lodzkie Region is located in the center of Poland, and Lodz, its capital city, just 130 km from Warsaw. It is rich in historical monuments, ideal places to rest, rich folklore traditions and has great cultural values.

First of all, Lodz is a fascinating city, which at the end of the 19th century grew the fastest in the world with a unique whole of interwined four cultures: Polish, German, Jewish and Russian. Rapid development of Lodz was described by Władysław Stanisław Reymont, winner of the Nobel Prize for Literature, for the novel „Promised Land”.

But not only Lodz is a center of culture. In many cities of the region one can participate in excellent performances and events. Due to its geographical location the region is particularly interesting. To understand Europe and its multiculturalism you need to visit Lodz and Sieradz, Łęczyca, Łowicz, Piotrków, Spała, Sulejów, Skierniewice, Kutno, Rawa Mazowiecka and other historical cities.

Five cultural routes run cross the region. Amber Trail follows the footsteps of merchants, who in the days of ancient Rome roamed upon the Baltic Sea shore in search of amber. Romanesque and Cistercian routes are associated with the development of Christianity in the Polish territory. Well preserved buildings of worship are not just monuments. In the ancient walls medieval music concerts and performances are organised. The route Warsaw-Vienna Railway is a reminder of the Russians, who in the mid-nineteenth century, built a railway line from Warsaw to Vienna. There is also a Grunwald route. In 1410 across the current area of the region troops of the king Władysław Jagiello marched, on July 15 that year they fought a victorious battle against the Teutonic Knights at Grunwald.

So visit the Lodzkie Region to meet the rich mosaic of cultures, sights, customs and traditions right here in the Polish heart of Europe.
Ladies and Gentlemen,

Lodzkie Region is a remarkable place owing to, for the most part, its inhabitants. However, what also makes this area unique, is its location on the intersection of Europe’s two main (both in the past as well as in the present days) communication routes (Paris – Berlin – Warsaw – Moscow and Mediterranean Sea – Baltic Sea). These two features contributed to Lodzkie Region’s exceptional cultural heritage, and the efforts of regional and local authorities made our land an attractive place to live, work and rest.

Given this opportunity which is a joint publication with our Partners from the Visegrad Group, I would like to cordially invite you all to come and discover our Region’s history and present. Unique monuments, very well preserved natural enclaves, diversified cultural and tourist offer (including active tourism) – everyone will find something to enjoy here.

I invite you for a visit

Witold Stępień

Marshal of the Lodzkie Region
